

How to Deploy Policy Simulator on Shinyapps.io

Step-1: In Ribbon-3 (right to the Run App) there is an arrow besides blue icon. Click on that arrow.

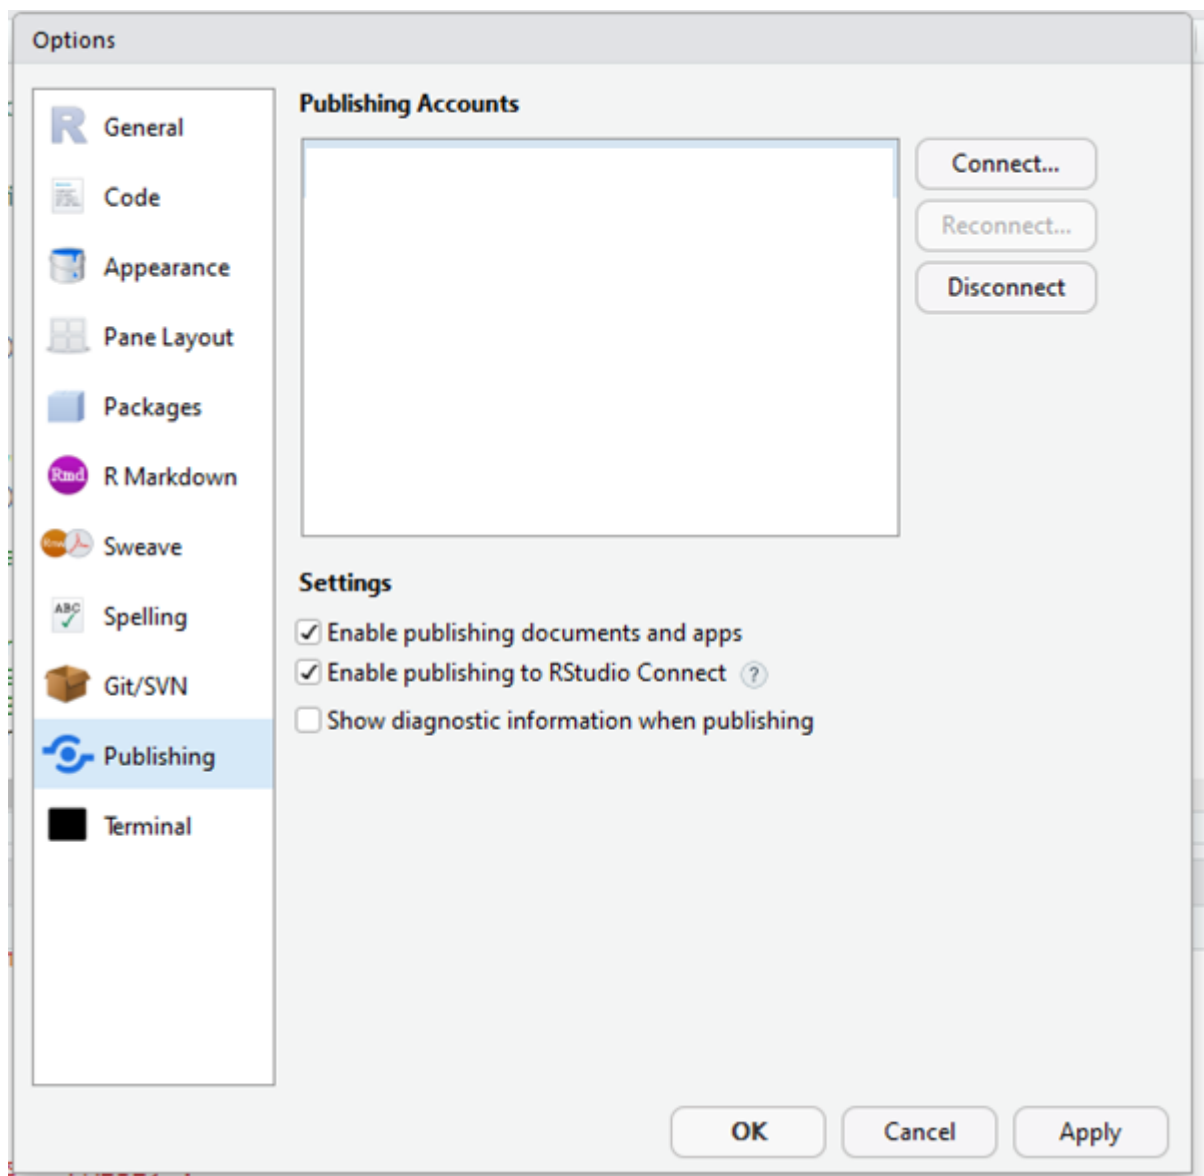

This Blue icon is shiny apps deployment icon and is only available if you open app.R in R studio.

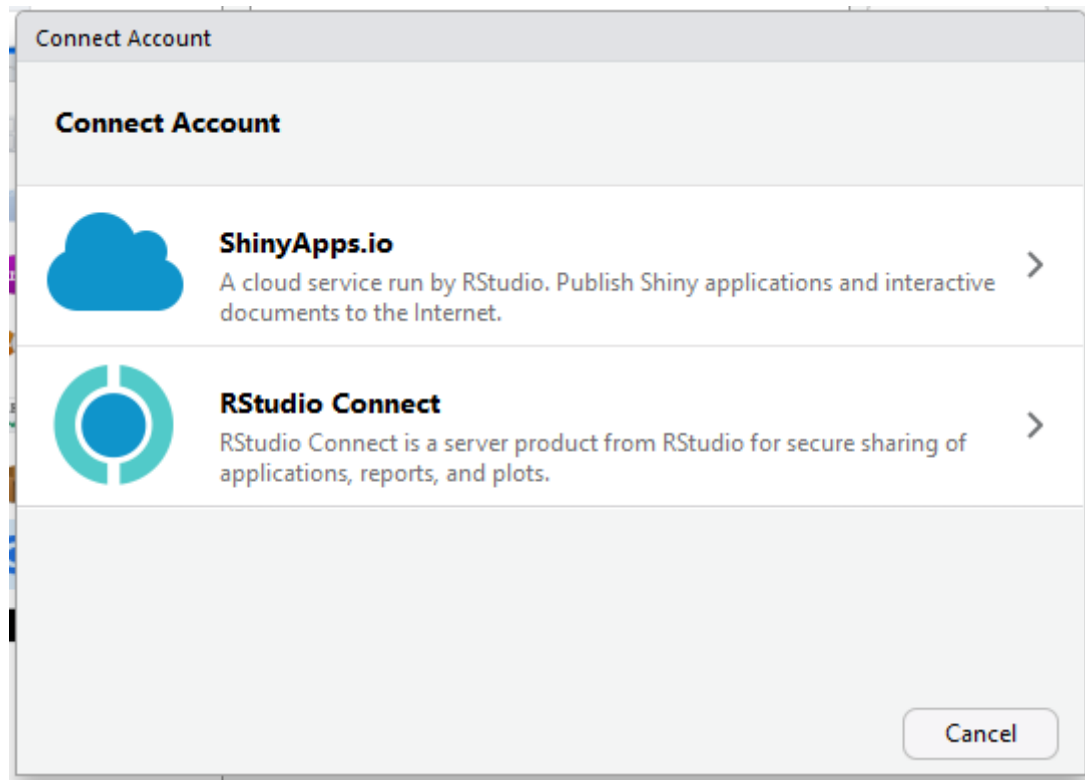

Step-2: After clicking on arrow it will open up following list. Click on Manage Accounts option

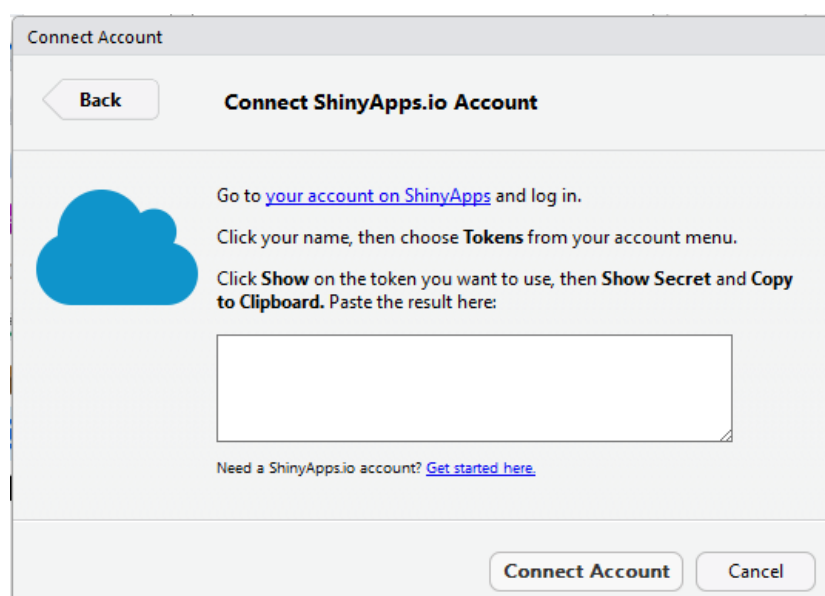

Step-3: It will leads to popup screen that with the title options.

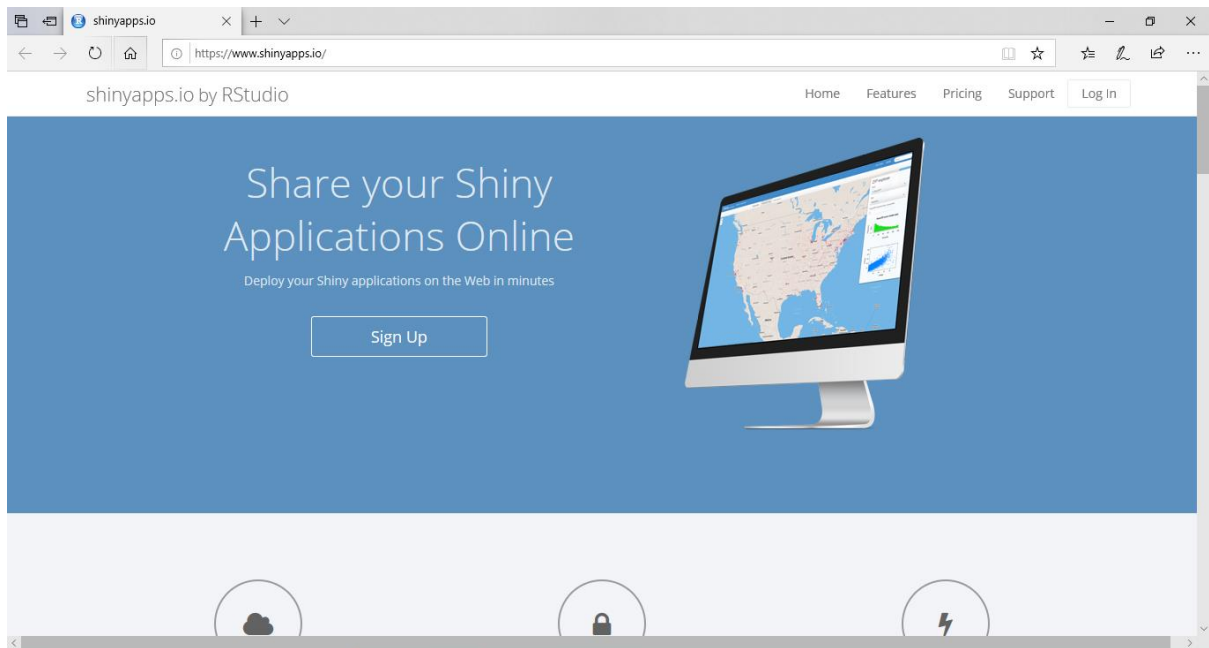

Step-4: Click on “Connect” button and Connect Account dialog will pop up. Select “ShinyApps.io”

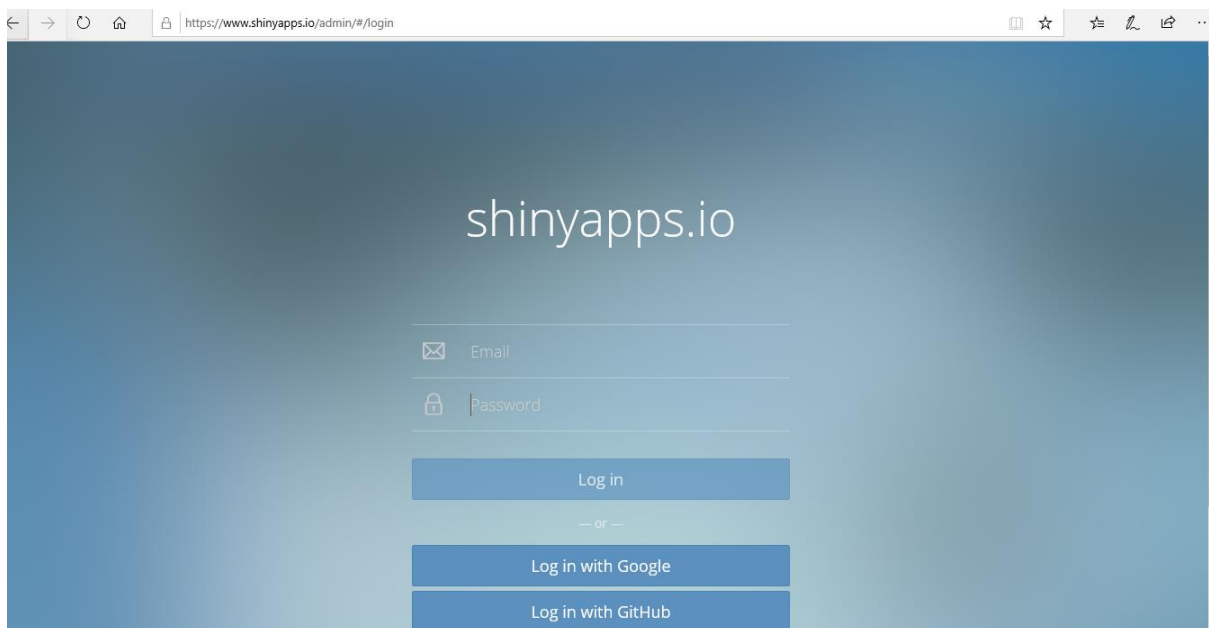

Step-5: Click on “your account on ShinyApps” link on the dialog.

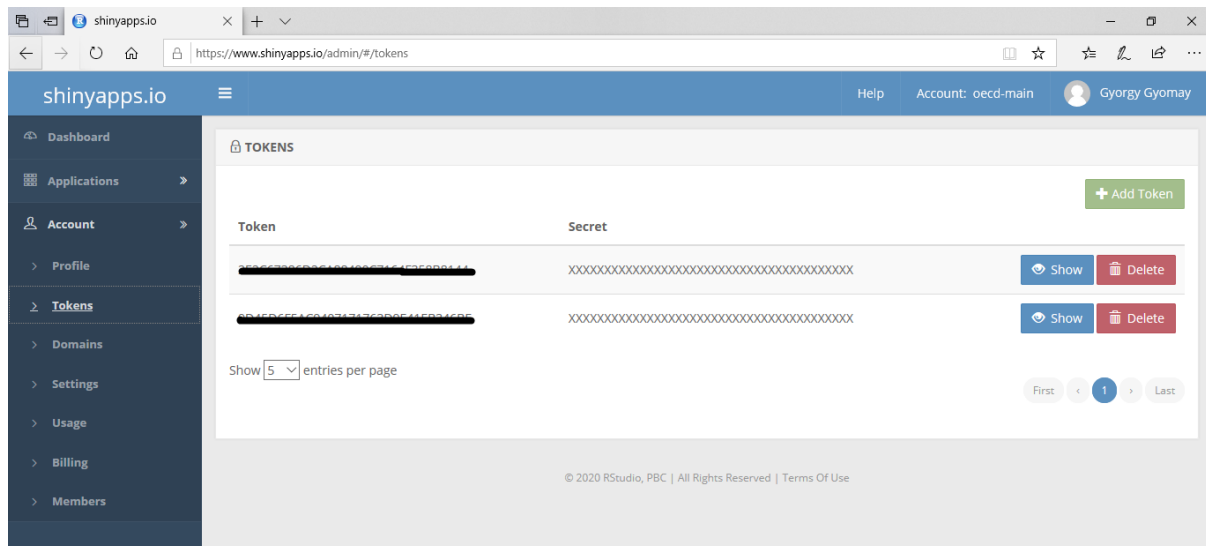

Step-6: It will direct you to shinyapps.io web page on web browser.

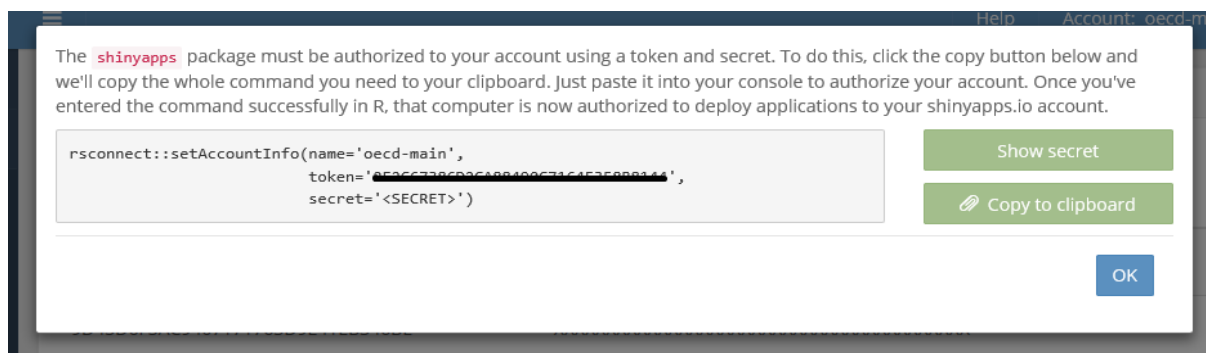

Step-6: Login with your credentials.

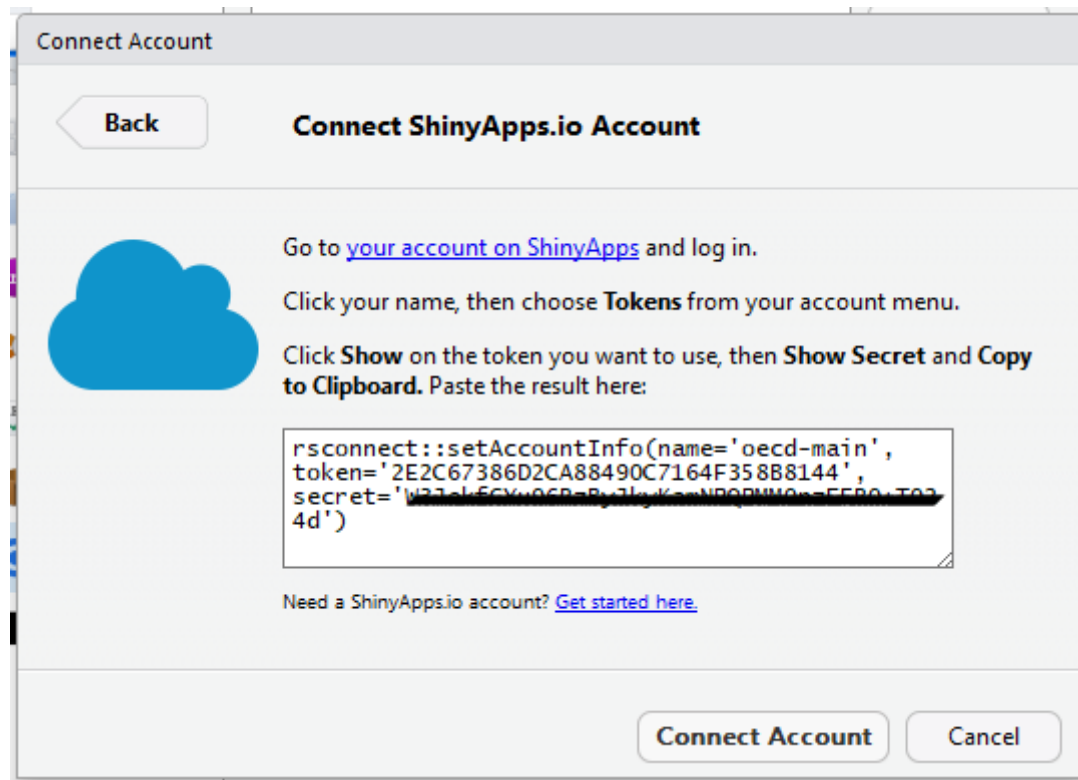

Step-7: After Login, Click on Account tab. Then there is another option name “Tokens” under “Account” tab in the side bar. Click on “Token” button. It contains secret key and token id.

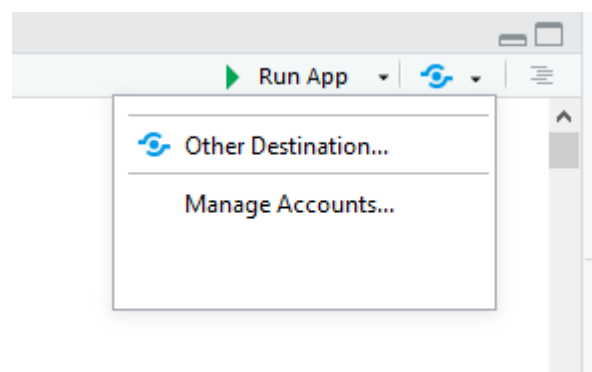

Step-8: To get secret key click on “Show” button it will open a popup which contains key. Then click on Show secret button and copy the complete code in the block or simply click on copy to clipboard

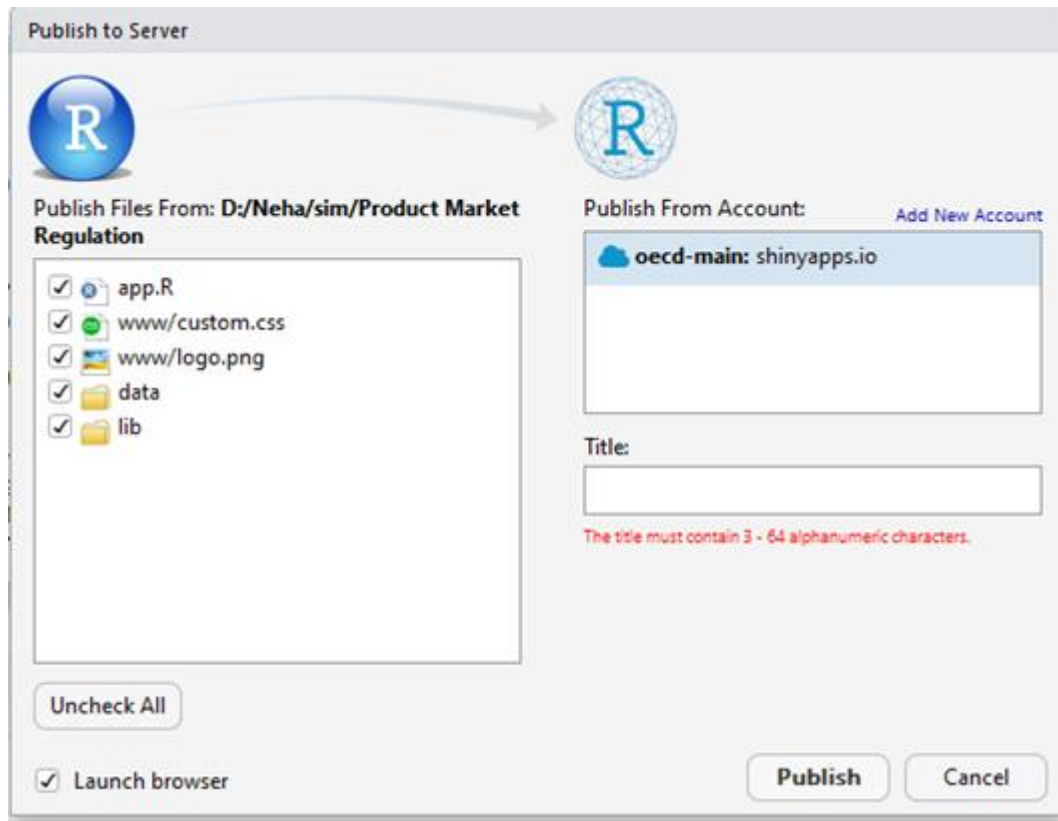

Step-9: After copy come back to R studio and paste the code in the block. Then Click on “Connect Account” .

Step-10: You have connected successfully to the Shinyapps.io now to to publish files go to blue icon and select “Other Destination” option

Step-11: All the relevant files gets auto selected and give name in the title bar then click on “Publish” button.

Step-12: Deployment of files gets started it takes couple of minutes to get deployed.

After deployment web link is generated which get automatically open in web browser.
